# Digital Dollar Coin

Project Details:

A cryptocurrency is a digital or virtual currency that uses cryptography for security and is difficult to counterfeit because of this security feature. Cryptocurrencies include bitcoin, litecoin, dogecoin, among others. It is any kind of peer-to-peer digital money powered by the blockchain technology. Ethereum, the popular cryptocurrency and blockchain system, is based on the use of tokens which can be bought, sold, or traded. One of the most significant token standards of all for Ethereum is called ERC-20, which defines a common list of rules for all Ethereum tokens to follow. This means that almost all of the wallets which support the ether currency also support ERC-20 compliant tokens. Therein lays the rationale for selecting Ethereum as the preferred choice for **DDCT**s crypto mining. Make Sustainability & Renewability with **DDCT** your First Choice today!

Coin Offer Details:

Website: http://digitaldollarcoin.com/
Email: info@digitaldollarcoin.com
Token/Coin Name: Digital Dollar Coin
Token/Coin Ticker: DDCT
Platform: ETH
Contract Address (ERC20): 0xb0DC7fdB068aBA78Cd79e1BF9006196fF3299C8f
